

# *Our Values*

---

## **Studio residents come first**

We are nothing without our residents and our community. We will strive to ensure we are doing everything we can to help you succeed. Our mission is clear: what can we do to best advance your interests?

## **Together we are more than the sum of our parts**

Collaboration is having a moment. But we see it as more than just a trend. It's our raison d'être, our lifeblood. Dare we say it, it's our soul. We will toil and struggle long into the night with our partners, to strengthen the start-up culture and community of this fair land.

## **Integrity is everything**

Hand on collective, collaborative hearts, we promise to help you build products, businesses and provide services that will ultimately make the world a better place.

## **We aspire locally as well as globally**

Many say it but we mean it: we acknowledge and we respect the traditional owners of our land. And we will focus our energies to empower our local communities. But we are part of a global network and our vision extends to the four corners of the earth, seeking out all possibilities.

## **We help make shit happen**

You have a dream? Bring it out into the daylight, welcome it like an old friend and then go forth and make it happen. We will be there, as close as you want or need, to help you make it goddam happen.
